

Answering your WW weekly Quiz

1- Please make sure you studied well before you take the quiz. It is highly recommended that you finish or at least attempt all your homework problems before taking the Quiz.

2- When you are ready to take your quiz, choose the week's quiz from the homework sets list on WW.

3- Once you are in the quiz, a timer will appear in the page to count down your allowed time for the quiz. Please use this timer to track the remaining time.

The picture in the right is for a quiz that runs for 120 minutes, note that your weekly quiz is a 50-minutes test.

Jump to Problem:[1 2 3 4 5 6 7]

- At the end of each question there is a “Preview your answer” button, use this tool to check if you entered your answer in the correct format.

1- If the entered answer is incorrect, WW will display a message explaining the error. Note that the “ preview answers” tool only checks for the format of your answer, it does not check for the correct number of sig fig or if your answer is mathematically correct!. It only shows you that your answer is readable by WW.

2- When you enter your answer as a fraction, WW will consider the whole calculated number. Note that this may not work if you need to report your result rounded to a specific number of sig fig.

You must correct if you have a mistake and preview again to avoid any formatting mistakes.

Entered	Answer Preview	Result	Messages
$\text{sqrt}(3.82^2+8.56^2$		incorrect	Missing close parenthesis for '('
		incorrect	
		incorrect	

At least one of these answers is NOT correct.

Note: You can earn partial credit on this problem.

Entered	Answer Preview	Result
0.6666666666666667	$\frac{12}{18}$	correct

- When you are done answering your quiz make sure that you preview all your answers by clicking “Preview Test” if you have not done that for each question by clicking “Preview Answers”.
- To submit your test , **you must click “Grade Test” button .**
- After you submit your quiz, you may go back to view your answers and prepare to ask a TA if you don’t know how to get the correct answer. Note that TAs will not answer any questions about any quiz before its due date. Therefore, you are welcome to discuss your quiz during any help desk sessions in the following week.
