

Contents

1	Data Analysis	1
1.1	Introduction	1
1.2	Instrumental errors	2
1.3	Random errors	4
1.4	Propagation of errors	10
2	Simple Harmonic Oscillations	13
2.1	Introduction	13
2.2	Undamped harmonic oscillator	15
3	Damping and Anharmonicity	17
3.1	Damped harmonic oscillations	17
3.2	Undamped anharmonic oscillations	18
4	Resonance: Forced, Damped, Harmonic Oscillations	22
5	Probing an Interaction Potential	25
5.1	Introduction	25
5.2	Experimental procedure	27
5.3	Optional: an alternate experimental procedure	29
6	Collisions and Conservation Laws	31
6.1	Elastic collisions	31
6.2	Experimental procedure	32
7	Angular Motion	37
7.1	Deriving an expression for rotational inertia	38
7.2	Rotational inertia of an unloaded cradle assembly	38
7.3	Geometrical factors in front of mR^2 : disc <i>vs.</i> ring	39
7.4	Parallel axis' theorem	40
8	Kater's Pendulum	43
8.1	Introduction	43
8.2	Experimental procedure	44
9	Bessel's Pendulum	47
9.1	The apparatus	47
9.2	Experimental procedure	48

10 Coupled Oscillators	50
10.1 Coupled oscillators	50
10.2 Coupled pendula	52
10.3 Experimental procedure	54
